Response to Arguments

The declaration under 37 CFR 1.132 filed 06/04/2008 is sufficient to overcome the rejection of claims 1-5 based upon Fuchs et al (WO 03/040076).

Allowable Subject Matter

Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance: The closest art to the structures of instant claim 1 is Fuchs et al (WO 03/040076) (P2, formula IIa). Although the structure of the reference has the symmetric diphenyl-ketone side groups, it lacks the claimed linking group composed of a carbon atom and a side chain containing oxygen, nitrogen, sulfur, chlorine or bromine. Additionally, the linking group of the instant claim is not rendered obvious by the teachings of Fuchs et al. Although other art teaches a linking group, of a diphenyl structure, that contains oxygen, sulfur, or chlorine, the art does not teach the linking group containing these atoms in a side chain off of a carbon atom. However, JP55-9028 teaches a diphenyl ketone structure having the linking group of instant claim 4 (see first structure), but the structure lacks the symmetric ketone-hydroxy group side chains. The instant structure is not taught nor rendered obvious by JP55-9028.

The specific structures of instant claims 2-8 also possess the unique linking group. Instant claims 9-10 pertain to a process of making the structures of claim 1. Additionally, claims 11-15 are drawn to compositions containing said structures.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
